

LUXUS

VENICE PAVILION

57th International Art Exhibition – La Biennale di Venezia

May 13th - November 26th 2017

The theme of the Venice Pavilion, the luxury, is told through the great tradition of craftsmanship of Venetian art of which the Pavilion, since 1932 and for many years, was the most prestigious showcase.

A path that intertwine shapes, symbols, objects of the past resumed the search for Venetian companies that are excellence in producing handmade art objects in glass, mosaic, fabric, porcelain, footwear.

In a atelier, are collected raw materials that then the genius of the craftsman's hands transforms it into works of art. The visitor is guided along a path that allows you to understand how matter is formed from the object of art.

The sensual beauty of Venice is relived through symbolic and sensory perceptions referencing interweaving colors, scents, play of lights. Its cultural tradition meets the Orient, constant reference of the glorious development of the city's history, with citations that recall the past and find themselves in the beauty of contemporary craft works.

The Venice Pavilion brings to life the luxury as an experience of a high beauty and precious that only the true aesthetic education allows you to appreciate, which the path of the exhibition of the Pavilion knows how to communicate.

The Curator
Stefano Zecchi
